

DML Factory Recorded Phrase Library
(DMC00003)
For Model DMC-1

The DML Factory Recorded Phrase Library is a listing of all the words, phrases, and tones that are available for selection as part of a message that can be played by the DMC-1 Digital Message card. Each phrase can be selected in CSG-M to create custom message strings. The tones listed in this document are shown in uppercase letters.

When creating a message in CSG-M, there are now two Factory Recorded Phrase Libraries from which to select: DMC00001 (the original standard library) and DMC00003 (the extended library). In addition to the 136 phrases and tones found in the original standard library, DMC00003 contains 154 new phrases.

The listing of the phrases in this document is presented both in alphabetical and numerical order. The number listed next to each phrase represents the memory location of that particular phrase as it is stored in the DMC-1. Although the phrases are numbered, there are intentional gaps (i.e., 49-64, 102-129, 169-193, 206-257, 302-322 and 376-385) in the numbering sequence.

All phrases, with the exception of phrase 48, are recorded in a male voice.

ALPHABETICAL LISTING

442. 900Hz TONE pulsed at 120 pulses per minute
441. 900Hz TONE pulsed at 30 pulses per minute
45. a
366. A
199. a fire emergency has been reported in the building
