Limited Access Equipment

Siemens has a simplified, cost-effective solution for equipment replacement in hard-to-access areas.

Obtaining the benefits of modern, high-efficiency equipment is easier with Siemens limited access equipment and services.

Adding new equipment to an old space? Not a problem with Siemens limited access equipment and services.

As the industry experts in installing and servicing chillers and other mechanical HVAC equipment, Siemens service technicians can help you solve the most difficult challenges with hard-to-reach areas.

With Siemens mechanical services team, existing facilities of any age, even those with space limitations, can gain the full benefits of increased energy efficiency, lower costs and higher occupant comfort with modern, state-of-the-art equipment.

Turn your plan into a reality

When planning to upgrade equipment or modernize your facility, include Siemens facility experts at the start. Backed by global know-how, our local team can help you plan for the most effective use of space and resources. They can implement a modernization plan or a retrofit, seamlessly.

Siemens provides modular chillers and equipment that is delivered and installed in sections. Our technicians assemble the equipment on site, and ensure components are integrated and installed to perform at optimal levels.

Answers for infrastructure and cities.

Benefit from the best options

The principal behind modular design allows installation in hard-to-reach places. Smaller equipment can be connected, providing maximum efficiency as each unit supports the other. Combined, the units offer expandability, redundancy and better capacity control.

Modular, limited-access equipment provides other advantages to your team and your organization, including:

- Cost efficiency — eliminates the need to tear-down walls or reconstruct spaces to fit larger equipment
- Energy efficiency — realize energy savings as your facility uses state-of-the-art equipment
- Easy serviceability — Siemens service agreements extend the life of equipment and remove maintenance responsibility from your team
- Maneuverability — our modular solutions fit into the most difficult spaces

Customize your plans

Allow the experts from Siemens to help you develop a plan to meet your specific needs. We can provide customized, modular pieces that fit through a standard 36" door and into the space required. Contact a Siemens representative to learn how limited access equipment and services can take your facility to the next level of efficiency and modernize.

Highlights

- Installs state-of-the-art equipment in areas with limited access
- Assembles equipment on site, ensuring components are integrated and installed at optimal levels
- Reduces installation costs and increases energy efficiency
- Provides customizable plans with modular pieces for your specific needs
